

Catch Up Challenge No. 1:

8 year old Marty has had the following Immunisations:

- 6w – DTPH, OPV, Hep B
- 3m – DTPH, OPV, Hep B
- 5m – DTPH, OPV, Hep B

He has presented to you today for immunisation, develop a catch-up plan for him...

Answer:

First Dose at 7 years and Older (Age Today)			
First Dose	dTap* and IPV	Hep B	MMR
1 month interval	Td and IPV	Hep B	MMR
1 month interval	Td and IPV	Hep B	
10 year interval	dTap and IPV		

*dTap may be considered for all three doses of the primary series. See 2008 immunisation Schedule: Health Provider Booklet, Immunisation Catch-up Schedules, Note 9 (pg. 52).

Catch Up Plan

Date Due	Vaccines
Today	MMR
1 Month	MMR

¹ A 6 month gap between doses 1 and 2 of MMR is better but 1 month is acceptable
